-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2,4-5, 7-17,19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamauchi et al [6806012] in view of Takehara et al [6190816]. Applicants claim a toner and an image forming method of using the toner. Yamauchi et al teaches an electrostatic image developing toner cell, which is similar to the island-sea of applicants. Applicants' attention is to figure 1 showing a sea-island with an area between each of the different islands. A releasing agent is taught in Col.22- Col. 24. Yamauchi et al fails to teach that n-paraffin is a release agent for a toner composition. Takehara et al teaches a toner with a domain-matrix structure Col. 5 line 1-10 and uses a low-melting crystalline compound wax a n-paraffin with a carbon number of 21 or more note Col.4 lines 15-35. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the wax as taught as a release agent in a domain matrix toner composition in the sea island structure as taught in Yamauchi et al to provide the same releasing ability that a low-melting compound provides.

2. Claims 3, 6, 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John L. Goodrow whose telephone number is 571-272-1384. The examiner can normally be reached on Monday -Friday.
